## HISTORICAL BACKGROUND

The history of Machakos Technical Training institute dates back to 1956 when the construction of the first buildings started. In 1957 the first students were admitted in the school then called Machakos Rural Training School. It was in 1958 when the government took over from the Machakos Municipal Council and renamed it Machakos Technical and Trade School - and students admitted in the following courses:-

- Leatherwork
- Masonry,
- Plumbing and
- Carpentry and Joinery

As the establishment grew, the Blind School (now Machakos Technical Institute for the Blind) next door, formerly registered as one Institution became a separate Institution in 1960. In 1967 the name changed yet again to Machakos Technical Secondary School when a two year secondary education course leading to Kenya Junior Secondary Education (K.J.S.E) Technical Examination started. The first K.J.S.E. was done in 1968.

In 1971 the last K.J.S.E was sat and in the same year, the first full secondary intake was done. In 1974 the first "O" level Examination, E.A.C.E was taken.

The institute was one of the 19 Government maintained national technical secondary schools which were upgraded to post secondary training institutes with the advent of 8 - 4 - 4 system of education in 1985. Thus the Secondary School curriculum was gradually phased out in 1987 when the last batch of secondary school students completed their K.C.S.E.

Thereafter, the institute has continued to grow from strength to strength as new courses get introduced. Currently the institute has a student enrolment capacity of 1200 although the boarding facilities can only accommodate 700 students. As a secondary school, it only catered for male students but today the number of female students surpasses that of male students by a big margin. This signifies the great diversity of the courses and training programmes being offered by the institute. Thus this year the institute is commemorating it's 45th anniversary of continuous training.

## STUDENTS ENROLMENT

Currently the institute has a student population of 725 students of which 375 are female and 350 male. Day students are only 60 but the number is expected to continue growing. Currently, 195 students are on industrial attachment while 120 new students are expected to report this term. There are only eight female students

who are currently enrolled in pure technical trades with the majority being in Electrical Engineering courses.

### COURSES OFFERED

Currently the institute offers over 20 different training programmes spread across nearly 60 different courses. The training programmes which have been fully established in the last 15 years include:-

- ◆ Accounting (K.A.T.C.and C.P.A)
- ◆ Business Administration & Management (Diploma and Craft)
- ◆ Carpentry and Joinery (Craft)
- ◆ Masonry (Craft)
- ◆ Clothing Technology (Diploma and Craft)
- ◆ Co-operative Management (Diploma)
- ◆ Electrical Engineering (Diploma and Craft)
- ◆ Electronics (Diploma and Craft)
- ◆ Food & Beverage Production Service (Diploma and Craft)
- ◆ Mechanical Engineering (Craft)
- ◆ Motor Vehicle Engineering (Diploma and Craft)
- ◆ Marketing Management (Diploma and Craft)
- ◆ Secretarial Studies (Diploma and Craft)
- ◆ Supplies Management (Diploma and Craft)
- ◆ Welding and Fabrication (Craft)

All the diploma programmes last three years whereas the craft training ones take two years. Admissions into craft courses is usually in May whereas diploma intakes are in September. The accounting courses are offered in sections/stages which last six months each and admissions are usually in the month of May. Students taking craft and diploma programmes are expected to spend between 5 - 7 months of their total training time on industrial attachment which is compulsory. This enables them to gain practical exposure in the world of work as they work alongside other employees in companies, firms or organisations. At M.T.T.I., industrial attachment is an important component of the training programme. It is therefore keenly supervised, rigorously monitored and evaluated.

Besides industrial attachment, all training programmes at M.T.T.I. are monitored and evaluated constantly in terms of content, structure and duration so as to ensure their relevance to the job market demands. This has led to high level of work and job skills which enable M.T.T.I. graduates to gain a competitive edge in the job market.

It is also through such periodic reviews and evaluations that a decision was made regarding the reduction in duration of craft programmes from three to two years starting with the May 2001 intake.
